

Sustainable Energy

People cannot live without electronic energy. Ensuring the access to energy is a key to prevent diseases and development of agriculture. Some countries don't have a sustainable access to clean and affordable energy, and as a result they face a high risk of getting pandemic diseases. The sustainable access to energy is one of the most important issues for all the countries in the world.

Your story should begin with this sentence: One day, Mr. Tanaka and Mrs. Tanaka were talking at home.
