

## Environmentally Friendly Materials

Nowadays, many companies are trying to use environmentally friendly materials. For example, some companies make bags and bottles from recycled plastic. Many people buy such products, and by doing so they help reduce waste and protect the environment. However, these products are sometimes more expensive. People should think about how to support this movement.

Your story should begin with this sentence: One day, Saki and her brother were talking on a bench.

## Supplements for Health

Nowadays, many companies are trying to use environmentally friendly materials. For example, some companies make **bags and bottles from recycled plastic**. Many people **buy** such products, and by doing so they help reduce waste and protect the environment. However, these products are sometimes more expensive. People should think about how to support this movement.

---

No.1 According to the passage, how do people help reduce waste and protect the environment?

By buying bags and bottles made from recycled plastic.

Your story should begin with this sentence: One day, Saki and her brother were talking on a bench.

One day, Saki and her brother were talking on a bench. Saki said to her brother, "I want to buy a new eco bag." At the shop, Saki was thinking about which bag to buy. Her brother was holding a swimsuit and imagining going to the beach. The next day, Saki was walking with her eco bag and thinking about what to buy. Her brother was walking with their dog.

**No.3 Some people say that schools should teach students more about environmental problems. What do you think about that?**

---

**I agree.**

**If students learn about environmental problems, they will take action earlier. This will help protect the earth in the future.**

**I disagree.**

**Schools already teach many subjects. Families should also take responsibility for teaching about the environment.**

## No.4

Today, most supermarkets charge money for plastic bags. Do you think more people will bring eco-bags in the future?

---

Yes(Why?)

Eco-bags are cheap and easy to use.

People also want to reduce plastic waste.

No(Why not?)

Some people forget to bring eco-bags.

Also, some people don't care about the environment.
